

# Hello, it's me, Kassidy B

All about me, Kassidy Buse

K. K. Buse<sup>1</sup>

<sup>1</sup>Department of Animal Science  
University of Nebraska-Lincoln

STAT 850  
October 2020

# Quick Facts

## Birthday

April 27

## Hometown

Bridgewater, SD

- Population: 491
- Claim to fame: Home of Sparky Anderson
  - Seriously...everything is named after Sparky

## Program of Study

- Ruminant Nutrition
  - Dairy focus
  - Specialization in Protein and Forages
- 1st year PhD
- Expected graduation date: Summer 2023

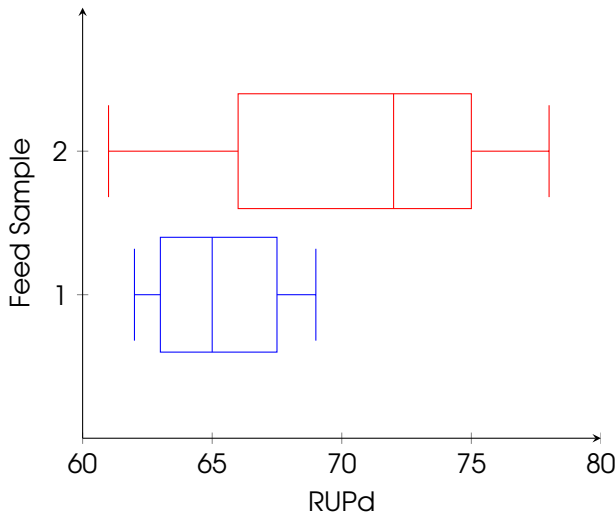

# If it isn't obvious enough...

## Moo

Obviously, it's cows. Growing up on a dairy farm, my life revolved around them. Seriously, I had to take care of the calves before I could go to school during the week (and trust me, they got done, even if I was late for the bus or school), and family holiday get togethers had to occur within the windows between milkings. As annoying or irritating as that might sound, I still can't picture a day in my life that doesn't revolve around them. I mean, who can resist a face (and ears...and nose) like that!?

# Favorite Plot

**Figure:** Most of our lab's work is in feed characterization, so box and whisker plots work well for showing the ranges and variation in values
